

LAUNCH FLEMISH CYCLING RESEARCHERS

THU
03/ APRIL

GHENT UNIVERSITY - Campus Sterre
Building S8 - Auditorium 1 (Valère Billiet)

In recent years, much valuable research has been conducted on cycling and bicycle mobility within various themes such as mobility, sustainability, health and technology.

Yet we received signals that researchers are not always aware of each other's work, which limits knowledge sharing and collaboration.

Therefore, the **Chair of Cycling** organises an **academic study day** to share insights, discuss ongoing research and reflect together on challenges and solutions.

Start: 10u – End: 16u | Lunch included

We warmly invite you to participate and contribute to a stronger network within cycling research!

Registration is required and can be done via: joyce.david@ugent.be

Symposium objectives:

- **KNOWLEDGE SHARING**
Discuss recent developments and innovations.
- **COLLABORATION**
Exploring interdisciplinary collaborations.
- **CHALLENGES**
Funding, data exchange and application of research results.
- **CONNECTION**
Bridging research and practice.
